

Quality Management Policy

Our policy regarding quality, environment, energy and occupational safety and health is an integral part of our business strategy. It is laid down by management and reviewed regularly regarding its adequacy. It fits well with the customer and market demands.

Our Vision

Throughout the world, our solutions enrich people's way of life.

Our ambitions

Aardvark is committed to continuing the campaign to remove the danger of landmines and remnants of war from communities all over the world by working with Military and humanitarian aid.

The Aardvark solution incorporates risk management, Satellite and UAV imagery for situational awareness, safe systems for the identification and destruction of land mines and the remnants of war and stand off explosive detection technologies.

We are a growth company, with the leading brand in the industry.

The following quality principles apply to all our activities:

- The quality of our products and services increases our customer's benefits and leads to improved shareholders value. Our success depends on our customer's satisfaction. With our products and services they reach their targets faster, better and easier.
- Integrity characterises our relations with our business partners and employees, the owners and the public.

For a systematic implementation of our quality principles and targets we pursue a certified quality management system according to the standard ISO 9001.

In all Aardvark's products, total safety of the personnel is paramount. Aardvark is exceptionally proud of the fact that no crew member of an Aardvark has ever been injured or killed in mine field or ERW clearance.

Aardvark maintains a policy of continuous improvement in all areas, all of which make the Aardvark systems, the most effective and safest clearance and detection equipment available.

This implies that we:

- Measure, observe and document the effects of our activities on the environment.
- Assess the implemented procedures and responsibilities as well as pursue the implementation of necessary corrective measures.
- Focus on improvement of performance and efficiency products and services. Prevention of accidents must not be seen as a legal requirement, but as the need to protect our employees.

Quality Management Policy

Continued

- It is one of the most important targets and fields of activity of our in-house social policy to ensure the safety and health of our employees.
- Occupational safety and health are a part of our executive tasks. At the same time we expect from our employees that they contribute to reach the targets regarding occupational safety and health in a responsible manner and within the frame of their possibilities.
- Occupational safety and health and economic activities are not contradictions. The safety and health of our employees take priority over economic considerations.
- Strict compliance with laws and regulations are basic principles of all our business activities.
- By means of continuous improvements in the field of quality, environment, energy and occupational safety and health we create more benefit for our customers and other stakeholders.
